Most soil not picked up by a vacuum cleaner is bonded to the carpet by some type of oil or grease. When subjected to high temperature cleaning solution these oily soils are more easily removed.

Heated Mini Extractor Features

- Heats to 200°F in minutes
- Produces 102" of Lift
- Weighs only 18 lbs.
- 16' Vacuum and Spray Hose with Long Reach 12" S/S Auto Detailer Tool
- 1 Year Limited Warranty

Suggested Applications

Auto, Boat Detailing Mass Transit Interiors and more...

Heated Hot Rod Specifications:	
Heating Element	1600 Watt
Solution Temperature	200°
Solution Tank Capacity	1.5 Gallon
Recovery Tank Capacity	2 Gallon
Vacuum Lift	102"
Piston Pump Output	60 psi
Temperature Detection	Lighted indicator
Temperature Regulation	Automatic Thermostat
Power Requirements	15 amps
Weight of Extractor	18lbs. w / no solution
Dimensions	17" H x 18" L x 13" W
Warranty	3 Year limited

Carpet & Upholstery Cleaning -High Traffic Lane Cleaning and more...

Panel Lights -

Toggle switch to "Heat." The panel light will go on. When heating cycle reaches maximum operating temperature, light will go off, Toggle to "Vacuum" and begin cleaning!

Features long reach S/S Auto Detailer Tool (shown at right)

Heats to 200 degrees in minutes, Hot Water Cleans 8x Faster

Designed for Auto, Boat and all types of Cleaning & Detailing;

- All S/S Long Reach Auto Detail Tool
- 16 ft. Vacuum and Spray Hoses reach all areas of the biggest SUV's
- 102" of Vacuum Lift
- 50 ft. 12 Gauge Cord
- 2 Gallon Recovery & 1.5 Gallon Solution Tanks
- 2" Swivel Casters for easy movement

• Light weight and portable - weights only 18 pounds

Durrmaid Heated Carpet Cleaner and Extractor

Made in America, our new, 2.1 gallon Durrmad is the very best when it comes to small extractors. It has more features and safeguards than any we have found.

Durrmad, Inc. was established in 1998 and introduced a new line of floor care products that were smaller, lighter and more efficient than anything available in the industry. Their first innovative extractor was nearly 100 pounds lighter than the competition while maintaining the same cleaning ability. Durrmad also designed the first "heated" Mini Extractor, and the latest, 2 gallon model is our privilege to offer.

Durrmad's "Professional Mini Extractor" is by far the most powerful, reliable small extractor available. *It has an amazing 102" of lift, 200 degree heat, and only weighs 22 lbs!* It is one of the rare, heated mini extractors that also offers a floor wand and crevice tool attachment.

This small, powerful unit, with it's (3) attachments, is the perfect cleaning machine. No extractor can beat it for professional mobile units, use in the home, the office, on boats and RV's. It glides effortlessly on high impact swivel casters you wish were available on common vacuum cleaners.

Soil not picked up by a vacuum cleaner is bonded to the carpet by oil or grease. High temperature cleaning is the only method of breaking down that oil/dirt cohesion. Our Mini Hot Extractor gives you this edge in your cleaning, and the low cost makes it affordable.

Durrmad Heated Carpet Cleaner / Extractor Recent Upgrades:

The new, 2 Gallon Durrmad has reached a new level for small extractors. The addition of an Internal Filtration Bag (shown at right) in the recovery tank enables true "vacuum" capabilities. The unit picks up heavy debris, sand and hair that would otherwise contaminate the tank and waste water. It can hold up to 5 pounds of debris.

As you know, a dry vac can miss sand and contaminants that have "stuck" to the fiber. When hot water and detergent is added to the process, this debris is loosened and sucked into the extractor.

The Durrmad Internal Filter allows you to start your extraction process immediately if you are in a rush! The bag is released with one turn of the lid and debris is dumped by opening the bottom of the bag.

The Durrmad has located its Control Panel at eye level above the fill access. Indicator lights indicate when water level is reached and the heat comes on. A heat light indicates when the automatic thermostat is reheating the water. There are separate switches for each function: Dry Vacuuming, Wet Extraction, Heat Only and Pump Only.

The Durrmad heats water within 3 degrees, throughout the solution tank! It heats in about 15 minutes, and the tank holds enough solution to clean 144 square feet, which is about two average automobiles. For the money, you'll never find a more efficient, versatile extractor.

The Durrmad has both vacuum and flow output regulators to restrict pressure. This is a very desirable feature and not found on most extractors.

While a heavy duty extension cord is a must for any power tool, this unit has a built-in safeguard (developed by Eaton) which trips the circuit breaker if someone accidentally uses a light, household cord. It can be immediately reset if this happens.

Carpet & Upholstery Cleaning "Detail" Tool Close Up

Durrmad's unique Carpet & Upholstery Tool "Auto Detail Tool" has all the safeguards. Its Lexan, see-through tips (there are two) allow totally clear viewing of vacuumed debris and moisture content.

The tips have stainless steel glides on the intake area to protect the edges and to insure friction free gliding. Their low profile design reaches under car pedals with ease.

The Detail Tool also has a plug to prevent debris from entering the solution hose during vacuuming. They thought of everything!

- Quick Change "Pop-Out" spray tips for carpet and upholstery applications. Change spray tips with a simple push & twist. The .02 tip is for carpet, and the .01 tip is used for upholstery. It cuts the water flow by 50% which greatly reduces drying time!
- Stainless Steel Glides eliminate friction and prevent high temperature warping.
- Vacuum Release Button reduces air flow suction. This is a necessity for headliners and other soft material.
- Clear Lexan material provides clear viewing of extracted water and dirt.
- Shorter 10" Length reaches under pedals and maneuvers smoothly in tighter areas.
- Tool Width: 3 inches

Durrmad S2H-1500 Standard Features

Heater: 1500 WattsTemperature: 200 DegreesWater/Vacuum Lift: 102 Inches

Airflow: 98 CFM

Solution Tank: 2.1 Gallons
 Recovery Tank: 2.4 Gallons
 Piston Pump Output: 60 PSI

Wand: 3" Upholstery detail tool with clear wand
 Vacuum Hose: Commercial Grade. 12 ft. x 1 1/4"

Solution Hose: 12 ft. x 3/16"

Power Cord: Pigtail

Sound Output: 85 dBA (3 ft Sound Level)Temperature Detection: Lighted Indicator

Temperature Regulation: Automatic Thermostat

Power Requirements: 15 amps
Weight of Extractor: 22 pounds
Shipping Weight: 30 lbs
Dimensions: 17" x 18" x 13"
Casters: (3) 2" Swivel

Tank: Polyethylene

Warranty: Housing/2 years, Mechanical & Electrical/1 year Limited
