

Plas Weld Kit 406060

The Image Plas Weld Kit is an easy to use system for the repair of splits to thermoplastic bumpers and components.

240-volt temperature controlled iron and custom shaped tip,

Reinforcing fine steel mesh is 'buried' in to the damaged component.

Any voids are filled with a universal filler rod.

Repair can be sanded and filled for completion in the normal manner.

A Teflon sleeve is included for protection of the iron, and to allow the kit to be packed away while iron is still warm.

Items included in the kit

- Welding Iron
- Custom Welding Tip and Insert
- Temperature Control Switch
- Zinc coated mesh
- Universal Welding Ribbons
- RCD Wired Plug
- Teflon Sleeve
