

Wheel Doctor 422900

Wheel doctor allows for the easy removal of kerb damage and regrinding of alloy rims prior to re-painting or polishing.

Machine can cater for rims up to 21 inches.

Rims are pneumatically clamped and centralised. Fully floating grinding arm, allows for grinding/polishing at all angles.

Unit is single-phase power supply, and requires air supply to operate wheel clamp system, and built in bead breaker
